

Environment, Health & Safety Guideline

We at **Chanakya University** are committed to maintaining and providing for the people, community, and ecosystem. The Environment, Health, and Safety (EHS) guideline of Chanakya University seeks to make the most effective use of all university resources, minimize and adverse environmental impact, comply with relevant legislation, and encourage all members of the Chanakya University community to develop a sustainable approach to their work and lifestyle. We aim to minimize losses they may arise due to fire and other emergencies. Chanakya University with its tagline of "putting people first," recognizes people as its most important asset and is committed to providing safe and healthy working conditions for those, studying, teaching and working on the premises.

Scope:

The Environment, Health, and Safety guideline applies to each stage of the academics and development of academic and extracurricular activities as well as services, from research through to full-scale operation, in all its domains. It applies to every stage in the life cycle of processes and services.

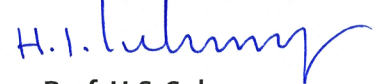

Implementation:

In implementing environment, health, and safety guideline, Chanakya University will:

1. Contribute to sustainable development through the establishment and implementation of national and international environmental, health, and safety standards to meet the requirements of relevant regulations and codes of practices.
2. Provide appropriate training and disseminate information to enable all employees to accept individual responsibility for the environmental, health, and safety implementation of the best practices and work in partnership to create a culture of continuous improvement.
3. Instill a sense of duty in every employee towards safety and safe work practices, as well as that others who may be affected by the employee's action.
4. Provide and maintain facilities, equipment, operations, and working conditions which are safe students, staff, faculty, visitors, and contractors at the campus premises.
5. Ensure safe handling, storage, use and disposal of substances and material that are classified hazardous to health and environment.
6. Reduce waste, conserve water, energy, and promote recycling of material wherever possible minimize the impact of our operation on the environment.
7. Institute and implement a system of regular EHS audits to ensure compliance with laid down guideline, benchmarked, standards and requirements of laws, and applicable codes and practices.
8. We strive for continuous improvements in our Environment, Health and Safety Management System.
9. Reviewing and revising the EHS guideline as necessary and regular intervals.

All Individuals at Chanakya University have responsibility for the implementation of the guideline in areas under their control. They are to ensure that the activities conducted are as per appropriate procedures and aligned with the objective of the Chanakya University Environmental, Health, and Safety guideline.
